### **Kitagawa-NorthTech Expands Workholding Productivity Offerings**

*Kitagawa-NorthTech, Inc. added to their product line the BBT200 series, a two jaw version of the BB200, to help customers achieve increased productivity and reduced costs.*

Schaumburg, IL – March 3, 2011 – Kitagawa-NorthTech, Inc. has added the BBT200 series, a two jaw version of the BB200, to their family of products. “The BBT200 series solution has been needed for a long time to properly integrate from a BB200 to a two jaw application when necessary, without fluctuating to a larger size chuck,” stated Colleen Juhl, Kitagawa-NorthTech Marketing Manager. This new series maintains the same outer diameter, through hole and max speed as its three jaw BB200 counterparts; ensuring quicker setup times, eliminates higher investments for a larger two-jaw solution, and increases overall productivity and through put.
