## **Kitagawa-NorthTech Expands Chuck Sizes**

Schaumburg, IL.... Kitagawa-NorthTech has recently expanded their offering of precision lathe chucks to include larger sizes. “By expanding our product offering, we have responded to the needs of many of our customers in the aerospace, energy, off-road and other construction industries that required significantly larger workholding capacity than we could previously supply”, stated Bill Graham, Kitagawa-NorthTech marketing manager,

The new expanded series of lathe chucks are available in standard 3, 4 or 6 jaw configurations as well as custom engineered designs for specific applications. Product range will be up to 1600mm (63”). Kitagawa-NorthTech will also provide parts and service for these new chucks as well as a complete line of jaws.
